Component 2 macro-activities

(Annual Work Plan 2017 – Macro-Activity 2.6)

One Chinese short-term expert

Topic 2.1.4

An integrated system for the coordinated management of the social assistance system

POLICY SUGGESTIONS

TERMS OF REFERENCE (ToR)

1. **Background**

1.1 **General**

The purpose of the EU-China Social protection reform project (“the Project”) is to contribute to the improvement and inclusiveness of China’s social protection system through strengthening the institutional capability for developing policies, for implementing legal and regulatory frameworks and for supervising systems of social insurances, social assistance and financial management in the area of social security. In particular, the Project’s purpose will be pursued through the following three components in relation to which specific Chinese government entities playing the role of partner of the consortium have been identified:

- i. Component 1: Consolidation of institutional capacity for social protection policy development and reforms in collaboration with the National Development and Reform Commission (“NDRC”);
- ii. Component 2: Enhancing of institutional capacity for financial management and supervision concerning social security funds in collaboration with the Ministry of Finance (“MoF”); and
- iii. Component 3: Improving of legal framework and policy for social assistance in collaboration with the Ministry of Civil Affairs (“MoCA” and, together with NDRC and MoF, the “Chinese Ministries”),

These ToR fall under Component 2 of the project.

2. **Description of the Assignment**

2.1. **Overall and Specific Objectives**

2.1.1 Overall Project Objectives

The overall scope of the SPRP project is to further develop social equity and inclusiveness of economic development throughout Chinese society. For the Component 2, the main target is to enhance the institutional capacity for financial management and supervision concerning social security funds.

In 2017, the Component 2 will analyze the following three topics:

2.1.4 An integrated system for the coordinated management of the social assistance system

2.3.1 Development of Old-age Service Industry and Long Term Care System

2.3.2 Investment strategies of social funds and risk control methodologies

This ToR is for the topic 2.1.4

2.1.2 Specific Objectives

In recent years, Chinese social assistance has rapidly progressed. The promulgation of the Interim Measures on Social Assistance (2014) has represented a fundamental step that has determined a better integration of funds and institutions, promoted a better coordination among departments and the rapid development of means-test procedures, as well as the identification and check of the beneficiaries. However, a notable level of fragmentation still exists and the 3rd Plenary Session of the 18th CPC Central Committee has stressed the need to pursue and fully realize the modernization of the governance system and the governance capacity of the country.

MoF underlined some of the main problems that affect the expenditure performance of the Chinese

Social Assistance system, hence challenging the poverty alleviation effectiveness:

- i. In the first place the **connection and coordination among schemes** are insufficient and the resources devoted to social assistance are too scattered, which leads to a sub-optimal articulation between programs and policies, and results in the use of social assistance funds less effective than desired
- ii. The **management** of the system needs improvement
- iii. The **sharing of information and resources** among departments is not adequate
- iv. Multi-departmental, overlapping and missed **delivery of benefits** co-exist in the system-

In relation to these problems, MoF listed the following challenges to be considered as priority:

- 1. Optimize institutional design and coordinate social assistance resources*
- 2. Strengthen the integration and coordination of social assistance funds*
- 3. Standardization and scientification of Social Assistance and increase of protection level in line with socioeconomic development*
- 4. Establish positive incentive mechanisms*
- 5. Establish mechanism to promote a reasonable balance of responsibilities among the state, the society, and the individuals*
- 6. Construct information sharing platforms and strengthen the mechanisms to check information*
